# About Us

Hanson Steel Buildings has established itself as a quality supplier and installer of industrial steel buildings for the commercial market.

Investment in machinery and vehicles makes sure that we are ahead of requirements for Health and Safety, and taking advantage of all modern methods of delivery and handling what is complex product.

With extensive experience, working closely with a multitude of clients including industrial trade, government agencies and private customers across the UK.

Hanson Steel Buildings can provide the full project management of any sized contract, offering you complete peace of mind and reassurance that your decision to purchase a product from us is the right one.

We offer a diverse and flexible product range, designing and constructing bespoke buildings to suit your needs.

Built to any size and quantity, we design to your exact requirements, whether they are built on existing foundations or designed to suit new foundations, we provide a solution for all projects.

## Additional Services

Hanson Steel Buildings can also provide a wide range of additional services to compliment your building design and construction service. These include:

### Groundworks

From the initial project concept Hanson's can provide Site survey and groundwork services to ensure all aspects are considered at an early stage.

### Survey and Quotes

Carried out by a Hanson surveyor, we will visit you to discuss your requirements and be able to provide you with a quotation for all agreed work.

### Building Design

We can offer a wide range of options in terms of colours, finishes and level of insulation for your building. We also offer a wide range of optional extras, including personnel doors, roller doors, sectional doors, extensive choice of roof covering colour, materials and styles, the list is extensive.

### Planning Support

Most buildings will need planning permission from your local planning authority (LPA) if you are building something new, making a major change to an existing building.
